

A high-resolution, close-up photograph of a human fingerprint, showing the intricate ridges and valleys of the skin. The image is in a sepia or brownish tone, giving it a classic, textured appearance. The fingerprint is centered and occupies most of the frame.

IDENTITY MANAGEMENT SYSTEM

Identity Management in Higher Institution indicates the system of managing individuals (Students and Staff) their authentication, authorization and privileges within or across the institution and enterprise boundaries.

Goals:

1. Increasing security and productivity.
2. Reducing Examination malpractice and repetitive tasks
3. Controlling access to the Institutions facilities, example Library.

How to use the cards.

The card can be used for various purposes:

1. Examination; A Student is scanned before entering an examination hall and during examination to confirm identity. This process will be fairly easy, considering that a lecturer can use its mobile phone for this purpose
2. Security; Access to the institutions premises or specific facility can be restricted to only card holders, this can be achieved by a quick scan before an individual is allowed to gain access.
3. Library; A quick scan can be carried out to confirm identity before an Individual is allowed to borrow library materials.
4. And other purposes.

FEATURES

1 Embedded Security codes on the card

2 Code readable by an Authorized code application, specifically designed for intiutions.

3 The code application can run on Microsoft Operating System for computer scanning.

4 The code application can also run on Android and window OS for mobile phone scan

5 Internet access is not required to read card information
