

INTEGRATED EDUCATION MANAGEMENT SYSTEM (iEMS)

for higher education

The Integrated Education Management System iEMS, is an innovative Enterprise Resource Planning (ERP) Platform specifically designed for use in Education Institutions.

This suite of integrated cloud-based business management software solution has been designed and developed by NetPro International Limited for use in universities, polytechnics and colleges of education within Nigeria and West Africa.

It helps management establish full control and visibility of all key processes along the student journey. It supports interaction with students while enhancing their overall experience from application stage to even when they become alumni

WHAT IS THE iEMS?

netpro 

Improve revenue generation
and accountability

Improve overall efficiency
and productivity within
the institution

Define and maintain standard
business processes.

Improve the service
approach to applicants,
students, alumni, staff

OPPORTUNITIES

We understand the need for quality services in the Higher Education system and also the difficulty in selecting and implementing sustainable ERP solutions within the sector. Higher Education faces the constant possibility of decrease in revenues due to customer perceptions of slow delivery and services.

We are presenting you the opportunity to help your institution to stay ahead of customer satisfaction trends. Our easy to use/learn solution is customizable, scalable and easily integrates with several CRM solutions and can enable Higher Education to fully realize the benefits of improved productivity throughout the entire student life cycle through technology.

It is a web-based application that requires no special hardware or software to be used. It can also be accessed through mobile web browsers and apps available on Android and iOS. It has been designed to aid in the management of departments and multi-campus from one location. Most importantly, we provide the staff training and support for this range of services to ensure simplicity and enhancement of quality of education and improve the business processes of your institution

OUR PROPOSAL

TIMELINE

Services can be fully customized and deployed within a period of 90 days or less. This is subject to the required level of service.

However, our robust project management framework allows us to implement and deliver solutions seamlessly and within agreed timelines.

OR LESS

1 We have flexible costing models

2 The iEMS could be deployed using a zero cost of ownership

3 The SAS model also allows for an annual licensing and support

4 A details pricing will be issues as soon as requirement engineering

PRICING

We look forward to working with your institution to help support your efforts to improve quality education throughout your students' life cycle. We are convinced that we can meet the needs, and stand ready to partner with you in delivering an effective IT support solution.
