

LEARNING MANAGEMENT SYSTEM

iLEARN

The Learning Management System (LMS), otherwise known as the Virtual Learning Environment is the most important tool in the delivery of online-learning. This component of the reform project is thus of utmost importance and needs to be designed, developed and implemented in ways that meet international best-practice.

Most importantly, the overall design, implementation and management must be aligned the Guidelines for Open and Distance Learning in Nigerian Universities as stipulated by the Nigerian Universities Commission.

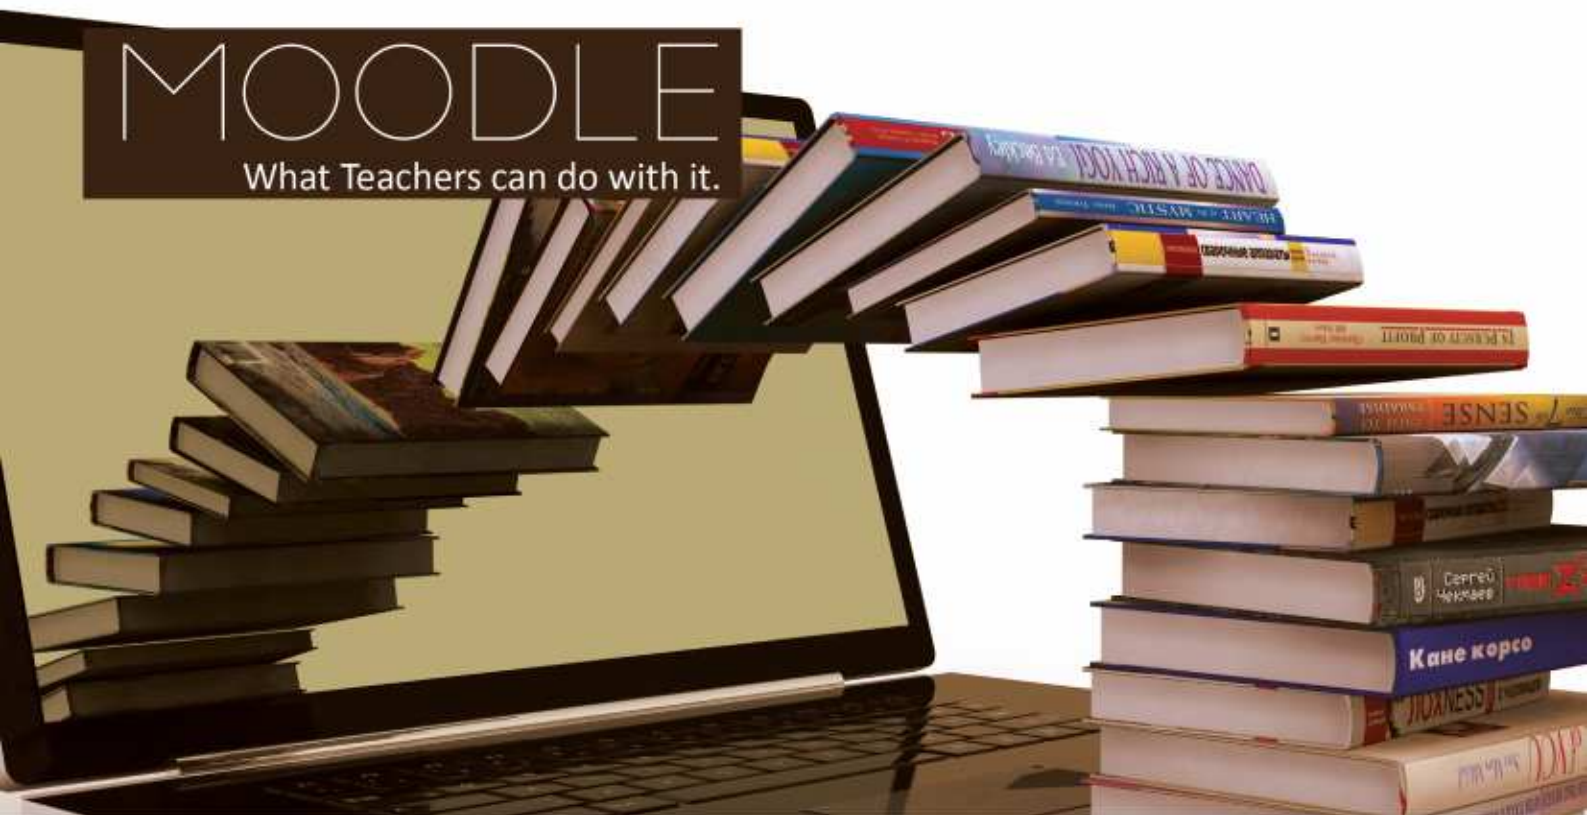

E-Learning can be approached and implemented in different ways. We consider a blended delivery method more suitable as it ensures a better transition for learners and trainers that are still adapting to new models and methods of training delivery

NetPro's iLearn is a Learning Management System (LMS) built on Moodle, an open source web application used to create interactive online learning sites and it is also a FULLY CUSTOMizable suite to suit specific client needs.
